STEWARD L. COHEN, ESQ.
A Lawyers Review of Critical Sedation Related Medical Malpractice Cases

www.PediatricSedationConference.com
Dear Colleagues and Friends:

It is our pleasure to welcome you to the 2016 Pediatric Sedation Outside of the Operating Room weekend conference, Friday Fundamentals of Sedation: Reviewing the Basics, Bridging the Specialties Symposium, Friday Pediatric Sedation Simulation Workshop, and Saturday Pediatric Dental Sedation Simulation Workshop. This year we are again presenting a unique, enriching, and exciting multidisciplinary conference.

We are thrilled to host the 11th annual conference in San Francisco, CA. As always, we have a diverse group of internationally and nationally recognized speakers and attendees from a variety of disciplines. The disciplines represented include: anesthesiology, emergency medicine, dental medicine, hospital medicine, intensive care medicine, pediatrics, nursing, oncology, cardiology, radiology, hospital administration. Attendees have traveled from countries not limited to but including Italy, Netherlands, Greece, Israel, Canada, Australia, Hong Kong, New Zealand, Japan, Brazil, Indonesia, South Africa, and Singapore. The specialized tracks, round table luncheons, and open forums enable us to share our experiences, ideas, and challenges.

On behalf of the entire faculty, I would like to invite you to attend “Pediatric Sedation Outside of the Operating Room.” We are certain that you will find the course and workshops both educational and enjoyable.

Sincerely,

Keira P. Mason, MD
Course Director
KEYNOTE SPEAKERS

STEWART L. COHEN, ESQ.
A Lawyers Review of Critical Sedation Related Medical Malpractice Cases: Learning and Sharing for Future Safety of Our Patients and Ourselves
Partner of Cohen, Placitella and Roth. Won a landmark $25 million case, recognized as one of the Top 100 Verdicts in the United States. President, Brain Injury Association of Pennsylvania. Vice President, United Cerebral Palsy of Philadelphia. Multimillion dollar recoveries in medical and hospital malpractice cases.

J.R. MARTINEZ
BEST-SELLING AUTHOR
Survival, Strength and Spirit
Jose Rene “J.R.” Martinez is an American actor, author and retired U.S. Army soldier. In March of 2003, Martinez was deployed to Iraq. In April of 2003, he sustained severe burns to over 34 percent of his body when his humvee hit a roadside bomb. He is the author of the New York Times bestseller “Full of Heart: My Story of Survival, Strength, and Spirit.” Martinez serves as a spokesperson for Operation Finally Home. J.R. began his acting career on the Emmy Award winning daytime drama “All My Children.” Many remember him best as the season 13 champion on “Dancing with the Stars.”

STEVEN SHAFER, MD
Michael Jackson, Murder, Mayhem and Mystery: The Propofol Quandary
Steven Shafer, MD is a Professor of Anesthesiology at Stanford University. In 2011, the International Society of Anaesthetic Pharmacology (ISAP) awarded Dr. Shafer their Lifetime Achievement Award. Dr. Shafer is the Editor-In-Chief of Anesthesia & Analgesia.
He was the expert witness in the Michael Jackson manslaughter trial. The keynote lecture will recount his experience and personal accounts of the Michael Jackson manslaughter trial. Dr. Shafer will discuss the 17 violations of the standard of care that could have led to Jackson’s serious injury or death.

STEWART L. COHEN, ESQ.

Dallas, Texas
FRIDAY, SEPTEMBER 9, 2016
FULL-DAY SEDATION SYMPOSIUM

The Fundamentals of Sedation: Reviewing the Basics - Bridging the Specialties

COURSE DESCRIPTION

BACK BY POPULAR DEMAND! A Comprehensive Review of the Essentials of Pediatric Sedation
This one-day course is a comprehensive introduction and review of the fundamentals of pediatric sedation. This offers a unique opportunity to update your knowledge in the format of didactic sessions, open forum question-and-answers and clinical case reviews. An optional hands-on workshop will provide personalized one-on-one faculty attention to gain hands-on experience using manikins to practice basic airway resuscitation skills.

This course is designed to provide a review of topics related to the safe and effective delivery of minimal, moderate and sedation by inhalation, enteral, and parenteral routes of administration. This course is intended to be an introduction and review of the up-to-date policies and guidelines governing sedation. The topics will include physiological monitoring, airway evaluation, the etiology and management of central and obstructive apnea, patient assessment, discharge and recovery guidelines, risk factors for adverse events, emergency preparedness, non-pharmacologic techniques and the basic pharmacology of commonly used sedatives. Clinical case presentations will be presented in an interactive format to maximize discussion, collaborative sharing of ideas and consideration of all options. Case studies will include challenging and complex situations. Question and answer sessions will provide participants with forums to ask questions and discuss specific issues with course faculty.

This course will feature recognized leaders and faculty from different specialties, all leaders in the field of sedation. The attendee will have the opportunity to gain hands-on experience learning airway techniques to rescue patients from deep sedation, including manikin practice with face masks and ambu bag along with the insertion of nasal and oral airways in a personalized setting with manikins and real equipment.

LEARNING OBJECTIVES

Upon completion of this activity, participants will be able to:

- Review current rules and regulations regarding minimal, moderate and deep sedation.
- Evaluate the pharmacology and clinical application of commonly utilized sedatives and weigh the advantages, disadvantages, efficacy and adverse events associated with each option.
- Evaluate complex and challenging sedation scenarios and formulate a plan.
- Provide a comprehensive review of patient evaluation including airway assessment, relevant medical history and vital signs necessary to evaluate patients as appropriate sedation candidates.
- Apply the discharge criteria and available recovery guidelines for discharge home following sedation.
- Determine the role and application of capnography.
- Prepare for unanticipated emergency situations.
### FRIDAY, SEPTEMBER 9, 2016

**FULL-DAY SEDATION SYMPOSIUM**

The Fundamentals of Sedation: Reviewing the Basics - Bridging the Specialties

**Course Director:** Keira P. Mason, MD  
**Director, Fundamentals of Sedation Symposium:** Mark Roback, MD

This full-day Introduction to Sedation Outside the OR symposium provides an overview of sedation and is directed toward a multidisciplinary audience that includes physicians, dentists, nurses and trainees. The morning session “sets the stage” for successful sedation and challenges the participants to consider their goals for sedation and how best to achieve them. Morning presentations address pediatric-specific anatomic and physiologic considerations, presedation assessment, appropriate monitoring and personnel as well as the Pediatric Airway Workshop; all of which are directed toward both medical and dental participants. Case scenarios will be presented with the intent to foster vigorous discussion of options for sedation and best practice models.

This course is intended for practitioners providing IV moderate sedation and deep sedation and offers an educational high fidelity simulation experience to provide skills for successful recognition and management of sedation-related complications. This unique and challenging program provides a clinical simulation experience that addresses the proper assessment and management of complications associated with moderate sedation, deep sedation. Following a brief introduction explaining essential principles, participants will demonstrate appropriate patient management on human patient simulators. (Laerdal SimMan). This full-day simulation workshop will provide each registrant with six clinical scenarios intended to improve individual skills as well as to impart an understanding of a team approach to crisis resource management. Each registrant will become part of a small team which will will rotate together through each of the six scenarios over the course of the day. The scenarios are intended to improve individual skills as well as the team's reactions and responses. Effective post-simulation debriefings will integrate critical performance feedback, promote reflective practice, and augment future performance. The full-day of high fidelity simulation scenarios are taught by national and internationally recognized faculty of simulation experts and aims to provide participants with knowledge and skills to recognize and manage sedation-related emergencies.

Course registration is limited to provide each registrant with an optimal, educational hands-on experience. There will be an optional “working” lunch which offers the opportunity to have a hands-on experience with personalized faculty attention using manikins to develop and improve airway skills. The Basic Airway Workshop is intended to solidify skills at delivering positive pressure ventilation using a face mask and ambu bag along with the insertion of naso and oral airways.

Medical simulation is a highly adaptable tool for evaluating individual knowledge and team performance. Medical simulation can improve patient safety by raising an individual's awareness of their practice and by enhancing team cohesion and performance. Simulation provides a safe arena for learning and evaluation, trains with actual equipment used in the clinical realm, and provides for repetition and reflection. Medical simulation should be educational, reflective and fun.

Upon completion of this activity, participants will be able to:

• Explain the importance of human-factors leading to and in the management of crisis and prepare for the management of rare events.
• Summarize the components of a simulation based learning encounter and determine how to incorporate simulation into the process of training sedation care providers.
• Establish and demonstrate appropriate components of an adequate primary assessment.
• Develop an algorithm for the recognition and management of various anatomical and pathological causes of airway obstruction.
• Create a differential diagnosis for the etiology of respiratory depression and understand the different management techniques.
• Demonstrate appropriate management of cardiovascular compromise.
• Demonstrate proficiency in directing a team during a crisis.
## Conference Schedule

**FRIDAY, SEPTEMBER 9, 2016**

**PEDIATRIC SEDATION SIMULATION WORKSHOPS**

**Course Director:** Keira P. Mason, MD  
**Director, Sedation Simulation Workshops:** James Fehr, MD

Optional and limited enrollment. Pre-registration is required. Participants will spend one hour in each of the six scenarios.

SEPTEMBER 10-11, 2016
WEEKEND COURSE OVERVIEW

TARGET AUDIENCES
This conference is intended for physicians, dentists, registered nurses, nurse practitioners, advanced practice nurses, pharmacists, and health care administrators. Specifically, the healthcare professionals have represented the specialties of anesthesiology, radiology, emergency medicine, hospital medicine, pediatrics, dental medicine, dental anesthesiology, intensive care medicine and gastroenterology.

COURSE DESCRIPTION
This annual conference entitled, Pediatric Sedation Outside the Operating Room, is taught by multi-specialists, renowned in pediatric sedation, from both the United States and internationally. This course offers both didactic lectures and panel discussions. Optional hands-on basic airway workshops will also be offered. Small round table discussions with the faculty and afternoon concurrent tracks provides the attendee with an opportunity for discourse and interactive discussions.

The field of sedation continues to evolve and policies, recommendations and Center for Medicaid and Medicare Service guidelines change in response to the health care environment. Currently, sedation guidelines and recommendations differ between specialty societies: For example, the American Society of Anesthesiologists (ASA) guidelines on deep sedation are not concurrent with those of the American Society of Gastroenterology nor American College of Emergency Physicians. Sedative agents, delivery methods and routes of delivery are changing as new techniques and outcomes continue to be explored and presented. This course is designed to fill the practice gaps created by this combination of evolving practice guidelines, differing practice standards among specialty societies, and continuing advances in sedation medicine and technology by updating and reviewing state-of-the-art techniques for safe and effective delivery of sedation.

This conference is intended to improve learner competence and performance by reviewing not only the basics of sedation but also updating the registrant to current, evolving and state-of-the art practice (i.e. knowledge). The hands-on workshops on airway management and patient simulation using mannequins will allow the learner to apply this competence to their everyday practice (i.e. performance) and prepare for the rare, unanticipated emergencies. Being prepared for emergencies as well as for the more common adverse events, the learner will be able to be better equipped to improve patient outcome. This conference is to increase the participant’s breadth of knowledge of pediatric sedation along with elaborate on ways to improve and track patient outcomes.

LEARNING OBJECTIVES
Upon completion of this activity, participants will be able to:

• Analyze recent changes in guidelines, regulations, policies and future developments in sedation systems and their impact on patient care.
• Perform an in-depth review of physiologic monitoring and develop an appreciation of the role and interpretation of capnography.
• Develop strategies to better manage airway emergencies.

CALL FOR POSTER ABSTRACTS
DEADLINE FOR SUBMISSION OF ABSTRACTS: JULY 1, 2016

Detailed submission guidelines, abstract submission form, and disclosure form can be found at: www.PediatricSedationConference.com

Abstracts are blindly reviewed by the abstract committee. Presenting authors will be notified if their abstract is chosen for poster display at the September 10-11, 2016 weekend conference.

REGISTRATION INFORMATION

Register by June 1, 2016 and receive a $100 discount towards weekend conference tuition. Promo code: SEDATION100. Reduced Weekend Course Tuition Fee for four or more attendees from the same hospital/institution: $649 per person. This reduced tuition fee only includes the weekend course (In order to receive this discount, please contact the HMS-DCE office at CEPrograms@hms.harvard.edu)

Registrations must be made via our secure online registration system. At the end of the registration process, a $5 non-refundable processing fee will be added to your registration, and you will have the choice of paying by check (drawn on a United States bank) or credit card (Visa, MasterCard or American Express). Postal, telephone, fax, and cash-payment registrations are not accepted. If you are paying by check, the online registration system will provide you with instructions and a printable form for remitting your course fees by check. Upon receipt of your registration form an email confirmation from the HMS-DCE office will be sent to you. Therefore, be sure to include an email address that you check daily/frequently. Your email address is used for critical information about the course including: registration confirmation, course evaluation and certificate.

INQUIRIES
By phone 617-384-8600, Monday-Friday, 9 AM to 5 PM (EST) or by email at: CEPrograms@hms.harvard.edu

ONLINE INFORMATION
To register or view activity information online, visit: www.PediatricSedationConference.com

COURSE LOCATION
All sessions for this course will be held at the Hilton San Francisco Financial District, 750 Kearny St, San Francisco, CA

DISCLAIMER
CME activities sponsored by Harvard Medical School are offered solely for educational purposes and do not constitute any form of certification of competency. Practitioners should always consult additional sources of information and exercise their best professional judgment before making clinical decisions of any kind.

HOTEL ACCOMMODATIONS
There is a limited number of hotel rooms available at the Hilton Financial District Hotel. Please reserve hotel space early. A limited number of rooms have been reserved at the Hilton Financial District Hotel until August 18, 2016. Hilton San Francisco Financial District, 750 Kearny St, San Francisco, CA. Telephone: 415-433-6600. Please specify that you are enrolled in this course to receive a reduced room rate of $279 USD/per night Two Doubles/ King. Hotel arrangements can also be made online at www.PediatricSedationConference.com. Please do not purchase non-refundable airline ticket(s) until you have received an email from our office confirming your paid registration.

ACCREDITATION
The Harvard Medical School is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Harvard Medical School designates this live activity for a maximum of 28.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

This activity meets the criteria of the Massachusetts Board of Registration in Medicine for 8 credits of Risk Management Study. Please check your individual state licensing board requirements before claiming these credits.

Through an agreement between the American Medical Association and the European Union of Medical Specialists, physicians may convert AMA PRA Category 1 Credits™ to an equivalent number of European CME Credits® (ECMECs®). Information on the process of converting AMA PRA Category 1 Credits™ to ECMECs® can be found at: www.eacme.eu

This educational activity has submitted an application for approval of nursing contact hours. Boston Children's Hospital Nursing is an Approved Provider of continuing nursing education by the ANA Massachusetts, the Accredited Approver Unit by the American Nurses Credentialing Center's Commission on Accreditation.

The American College of Emergency Physicians is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Friday Symposium (9/9/16): Approved by the American College of Emergency Physicians for a maximum of 9 hours of ACEP Category I credit.

Friday Simulation Workshop (9/9/16): Approved by the American College of Emergency Physicians for a maximum of 8.75 hours of ACEP Category I credit.

Weekend Conference (9/10-9/11/16): Approved by the American College of Emergency Physicians for a maximum of 14 hours of ACEP Category I credit.

ABMS & ACGME COMPETENCIES
This course is designed to meet one or more of the following American Board of Medical Specialties/Accreditation Council of Graduate Medical Education competencies:

• Patient Care and Procedural Skills
• Medical Knowledge
• Practice-based Learning and Improvement

IOM COMPETENCIES
This course is designed to meet one or more of the following Institute of Medicine competencies:

• Interdisciplinary Teams
SEPTEMBER 10-11, 2016

Two Day Weekend Course: Expanding All Horizons

Physicians and Dentists $799
Residents/Fellows, Nurses, and Allied Health Professionals $549

Optional Breakfast Breakout Panels:

Dexmedetomidine $100
PBLD for Emergency Procedures $100
Airway Management Hands-On Workshop: Part 1 $150
  *Please note that this is a basic airway workshop and that advanced devices/skills
  are offered in Part 2
Airway Management Hands-On Workshop: Part 2 $150
Acupuncture $150
Propofol $100

Optional Lunch Breakout Panels:

Sedation Techniques for Radiological Procedures $100
PBLD: Developing and Starting a Sedation Program from A-Z $100
Incorporating Distraction and Image Guided Techniques into a Busy Sedation Practice: Non Pharmacological Techniques $100
PBLD: Sedation Case Studies $100
Open Discussion: Challenges of Pediatric Dental Sedation in an Office Based Setting $100
Ketamine $100

Reduced Weekend Course Tuition Fee for four or more attendees from the same hospital/institution: $649 per person. This reduced tuition fee only includes the weekend course. (In order to receive this discount, please contact the HMS-DCE office at ceprograms@hms.harvard.edu)

FRIDAY, SEPTEMBER 9, 2016

Full-Day Pediatric Sedation Simulation Workshop $679
Fundamentals of Sedation: Reviewing the Basics - Bridging the Specialties $589
Lunch on your own OR $150
Airway Management Hands-On Workshop: Part 1
  *Please note that this is a basic airway workshop and that advanced devices/skills
  are offered in Part 2

SATURDAY, SEPTEMBER 10, 2016

Simulation Workshop for Dental Specialists $679
*Add-On: Simulation Workshop for Dental Specialists. Dentists registered for the weekend conference can replace half a day of didactics on Saturday 9/10 for the dental simulation workshop $350

Please note, a complete schedule for the Dental Sedation Simulation Workshop offerings are available online at: www.PediatricSedationConference.com
PEDIATRIC SEDATION
OUTSIDE OF THE OPERATING ROOM
SAN FRANCISCO, HILTON FINANCIAL DISTRICT HOTEL

SEPTEMBER 10-11, 2016
WEEKEND SEDATION CONFERENCE
Expanding All Horizons

FRIDAY, SEPTEMBER 9, 2016
Full-Day Sedation Symposium
The Fundamentals Of Sedation:
Reviewing The Basics - Bridging The Specialties

Full-Day Pediatric Sedation
Simulation Workshops

COURSE DIRECTOR
KEIRA P. MASON, MD
DIRECTOR, FUNDAMENTALS OF SEDATION SYMPOSIUM
MARK G. ROBACK, MD
DIRECTOR, SEDATION SIMULATION WORKSHOPS
JAMES FEHR, MD

PROMOTIONAL DISCOUNT!
REGISTER BY JUNE 1, 2016 and
RECEIVE A $100 DISCOUNT
WEEKEND CONFERENCE ONLY
