In May 2018 the WFSA published the WHO-WFSA International Standards for a Safe Practice of Anesthesia alongside the WHO for the first time. The Standards are intended to provide guidance and assistance to anesthesia providers, their professional organizations, hospital and facility administrators, and governments for ensuring and improving the quality and safety of anaesthetic care.

The WFSA played a key role at World Health Assembly (WHA) and at WHO Regional Meetings. The WFSA has official liaison with the WHO. At the WHA plenary, the WFSA presented statements on key agenda items and co-hosted events to draw attention to the essential role of anaesthesia in achieving Universal Health Coverage. At WHO Regional Meetings the WFSA submitted statements on UHC, the need to scale-up the anaesthesia workforce, access to medicines, and NCDs.

WFSA President Dr Jannicke Mellin-Olsen at the WHA in Geneva, Board Member Dr Philippe Mavoungou at the WHO Africa Regional Meeting

The WFSA continued to provide high-quality education materials. In 2018 the WFSA published 25 editions of Anaesthesia Tutorial of the Week (ATOTW). ATOTW, the sister publication of our journal Update in Anaesthesia, was read by thousands of people all over the world and is available in 4 languages. ATOTW is also widely used by medical students as a study aid.

SAFE Courses have reached over 3,000 providers. In 2018, 542 providers completed the SAFE Obstetric Anaesthesia course, along with 232 providers who completed the SAFE Paediatric Anaesthesia course. During the year we reached the dual milestones of 100 SAFE Courses and over 3,000 providers trained.

44 fellows undertook the Fellowship Training Programme in 2018. 44 young anaesthesiologists from 16 countries around the world embarked on subspecialty mentoring, learning more about specific anaesthesia subspecialties in order to become the future leaders and teachers of anaesthesia in their home countries. 364 fellows have been trained since the Programme began in 1996.

18 Scholars attended 5 congresses. Scholars attended conferences and congresses in Copenhagen, Dubai, San Francisco, Beijing, and Yamoussoukro. In 2018 the WFSA and Baxter also celebrated 10 years of collaboration on the scholarships programme. Winner of 2018 WFSA Innovation Awards announced: RevoCap: A Revolution in Global Capnography, an innovation presented by Maziar Mohsen Nourian and Dr Michael Lipnick won the WFSA Fresenius Kabi Anaesthesia Innovation Awards 2018. More information on the Award and the winners can be found here.

Help us train 500 fellows and reach 1 million patients by 2020 by donating to Fund a Fellow
